UNPARALLELED HOT-WATER TEMPERATURE CONTROL IN AN ELECTRONIC MIXING CENTER (EMC) THAT PLAYS IT SMART AND SAFE.

When you actually see it perform live, you'll change the way you think about central hot-water distribution systems. Designed specifically to provide $\pm 2^{\circ}\text{F}$ recirculation system control during zero-demand idling periods, our EMC also delivers remarkable performance across the full diversity of hot water use. And it has no minimum system draw-off requirement. With remote programming and control features, and building automation system interface capability built into the mixing unit, the EMC offers an unparalleled portfolio of valuable benefits. We don't just say it; we'll prove it to you online. Log on to www.armstrong-intl.com/aspe today and sign up for a live guided tour.
