From the President:

A special thank you to Craig McDowell with Omar McDowell company for organizing the Annual Clambake Social at the Cleveland Yachting Club.

The October Technical Session will be on the topic; Underground Cast Iron Installation, presented by Brian Black CISIPI Territory Manager.

The Wednesday, October 14, 2026, Dinner Meeting will be held at Independence Civic Center located at 6363 Selig Drive, Independence, Ohio 44131.

5:00 – 5:30	Chapter Board Meeting
5:30 – 6:00	Sign-In / Meet and Greet
6:00 – 6:30	Dinner
6:30 – 7:30	Presentation
7:30 – 8:00	Q & A

ASPE Cleveland is CASHLESS and now accepts PayPal, Venmo, or Credit Card! Your electronic payment will confirm your RSVP! No walk-ins will be permitted. Please click HERE by Noon on October 12, 2026. Please support your local chapter by attending.

Registration is now OPEN! ASPE 2026 Convention & Expo is taking place in Oklahoma City, Oklahoma from October 8-14, 2026. Register at https://expo.aspe.org/.

I encourage all members—from seasoned engineers to our ASPE Young Professionals (AYP) and Women of ASPE (WOA)—to get involved. Please join us at our next chapter meeting to experience the camaraderie and educational opportunities our chapter has to offer.

Let us know if there are any specific topics you would like to see our chapter sponsor. We are always looking for new ideas. Remember, without membership and participation there is no local chapter.

Regards,
Joe Deucher, C.P.D.
President, ASPE Cleveland Chapter

2026 - 2027 ASPE Meeting/Plumbing Class Schedule
October 2026

The above is the meeting/plumbing class schedule for the 2026-2027 ASPE year. Updated information will appear in subsequent newsletter issues. All meetings will be at the Independence Civic Center, 6363 Selig Drive, Independence OH 44131 unless otherwise indicated. The meeting/plumbing class, including dinner, is $20.00 unless noted otherwise. Reservations are required. A mini product show will be held before each meeting/plumbing class highlighting some of the materials discussed in class or products that will assist the engineer in understanding what they are designing or specifying.
All plumbing classes will qualify for 0.1CEU hours and will assist in preparation for the ASPE CPD examination.

The following times will be enforced as strictly as possible.
Make your reservations a minimum of two days before the meeting/class and try to be on time.

Evening Seminars:

- Chapter Board Meeting 5:00 - 5:30 pm
- Sign-in / Meet and Greet / Vendor Display 5:00 - 6:00 pm
- Dinner 6:00 - 6:30 pm
- Presentation 6:30 - 7:30 pm
- Q & A / Vendor Product Display 7:30 - 8:00 pm

Lunchtime Seminars:

- Mini Product Show 11:30 - 11:45 am
- Sign-In / Meet and Greet / Vendor Displays 11:45 - 12:00 pm
- Lunch 12:00 - 12:30 pm (Seminar to begin during lunch)
- Presentation 12:00 - 1:00pm
- Q & A / Vendor Display 1:00 - 1:30pm

CircuitSolver®
A ThermOmegaTech® brand

PROUDLY PROVIDING
THERMOSTATIC BALANCING SOLUTIONS
FOR OVER 10 YEARS

Hot Water Recirculation

In 2012, CircuitSolver® was developed to conquer the challenges inherent to conventional manual balancing valves. As the market's first **thermostatic balancing valves** used for domestic hot water recirculation, CircuitSolver® balances a system based solely on temperature as opposed to pressure or flow to guarantee hot water at **every fixture.** Dynamically balancing a system, CircuitSolver® ultimately **ended complaints** about the lack of hot water, and eliminated balancing processes and callbacks.

Cold Water Recirculation

Last year, we implemented our thermal actuator technology into the CircuitSolver® Union Cold Water balancing valves. These valves are installed in domestic Cold Water recirculation systems to mitigate the risk of Legionella and other bacterial growth. Cold water recirculation is becoming more prominent in hospitals to reduce water stagnation and ensure residual chlorine is distributed but can be beneficial to any commercial building that could experience periods of low flow or non-use.

MEDICAL GAS EQUIPMENT & SERVICES SINCE 1996

25+ YEARS OF EXCELLENCE

Annual Medical Gas Inspections

Medpipe's annual medical gas inspections meet the requirements of the following organizations:

- Centers for Medicare and Medicaid Services (CMS)
- Joint Commission (JCAHO)
- DNV
- State Health Departments
- National Fire Protection Association (NFPA)

Our computerized medical gas testing and maintenance tracking system is designed to streamline compliance and improve safety in healthcare facilities. This advanced system compiles testing and repair results, ensuring every component meets regulatory standards. With built-in inventory management, facilities gain full visibility into the status of their medical gas infrastructure. These customized reporting capabilities support better code compliance by providing clear, auditable records and proactive maintenance scheduling.

Customer Tailored Programs

We work with each customer individually to design a program specific to their facility that meets all requirements and assures continued compliance. Reports can be provided in both paper and digital format.

Source Equipment Preventative Maintenance & Inspections

Medpipe delivers comprehensive preventive maintenance and inspections of mechanical Central Supply Systems, including medical air and medical vacuum systems. Our highly trained technicians perform detailed assessments to ensure that your equipment operates at peak efficiency while adhering to strict safety and compliance standards. Medpipe technicians receive factory training on many manufacturers' equipment. Proactive maintenance helps minimize failures, extend the lifespan of critical systems, and maintain uninterrupted service, which is essential for patient care.

Medpipe offers technical support and is available to provide service on all major brands.

- Amico Source
- Rogers Machinery (Kobelco)
- Powerex
- Busch Vacuum Systems
- Allied Medical, LLC
- Ohio Medical Products
- Becker
- Beacon Medaes
- Tri-Tech
- Atlas Copco

Medical Gas Construction Verifications

As healthcare organizations strive to maintain excellence in the changing market, renovations are vital to their success. When construction projects call for medical gas systems to be installed or upgraded, a third-party verification (certification) is required.

The NFPA and the ASSE (American Society of Sanitary Engineering) provide guidelines for this testing to ensure that the equipment and installation meet the medical gas codes and standards. We have an experienced team of verifiers who maintain ASSE credentials and keep current with applicable codes.

We utilize state-of-the-art portable analyzers to perform testing on the newly installed medical gas components, ensuring that the project meets all design and installation criteria prescribed by the NFPA.

Construction Certification Services

- Construction Document Review
- Consultation Services
- Pre-Construction Testing/Evaluation
- Interim and Final Verifications (Certifications)
- Final Reports
- Bulk Oxygen System Certifications
- Dental Certifications
- Laboratory Certifications

MEDPIPE

Medical Gas Service

At Medpipe, we understand the critical nature of medical gas systems, which is why we offer comprehensive 24/7 emergency call-out services to ensure uninterrupted patient care. Our expert technicians are equipped to handle a wide range of urgent needs, including loss of gas or vacuum, alarm events, and leaking/malfunctioning outlets. Whether it's a scheduled repair or a middle-of-the-night emergency, Medpipe is committed to delivering fast, reliable support whenever and wherever needed.

Boom Inspections, Maintenance, and Service

NFPA 99 stipulates that non-stationary booms and articulating assemblies must be tested every 18 months or at a duration determined by a risk assessment. Boom manufacturers also recommend complete internal hose changeouts at specified intervals, mostly averaging 10 years. Medpipe offers a comprehensive boom inspection service to help customers meet these requirements and recommendations. Our program includes leak checking, visual inspection of interior hoses and fittings, function checks of Boom articulation and braking, outlet/inlet performance verification, and checks of electrical outlets and data ports. This ensures that your Booms provide easy, reliable access to the utilities housed on these fixtures.

Medical Gas Systems Training

Medpipe's classroom training solutions empower healthcare professionals with the knowledge and skills needed to safely and effectively manage and maintain their medical gas systems. Our courses cover system operation, maintenance protocols, and compliance standards allowing participants to gain practical, hands-on experience. Taught by an ASSE 6050-certified instructor, our sessions are tailored to the medical gas systems in your specific facility so that your team builds confidence working with the equipment that they are responsible for maintaining.

Backfeed Service

Renovations and repairs of critical infrastructure are frequently required in healthcare settings. When they involve shutdowns of medical gas or vacuum systems, it is often necessary to feed the affected hospital departments with temporary supplies of gas/vacuum. Medpipe's backfeed service ensures a continuous supply of medical gases or vacuum during planned maintenance, system upgrades, or emergencies. Our team provides seamless temporary solutions tailored to your facility's specific needs and seamlessly integrates with existing systems. Careful coordination with facility managers, respiratory departments, clinical staff, and contractors is crucial when shutting off the regular supplies of gas or vacuum, and Medpipe assists you throughout the entire process. We minimize disruptions to patient care and facility operations by prioritizing safety and efficiency. Whether shutdowns are planned or unexpected, Medpipe's reliable backfeed service ensures your medical gas supply remains uninterrupted.

Other Testing Services

Medpipe offers a range of other testing services for healthcare facilities such as environmental monitoring of hazardous workplace chemicals, air exchange testing, advanced leak detection, and more.

Replacing Your Water Heater Every Few Years is Not Our Business Plan

Conquest® condensing, gas-fired water heaters are constructed from Aqua**PLEX**® duplex stainless steel so they're corrosion-resistant in potable water at any temperature. Available in 199-1000 MBH, Conquest provides even more BTUs in small spaces and fits through a standard 36-inch doorway. With a thermal efficiency of up to 96%, long product life and a 15-year tank and heat exchanger warranty, you can't afford not to have one.

ISIMET	Utility control system to promote safety for the student as well as the instructor in the science laboratory learning environment.	LENOX	Leading manufacturer of plumbing tools and equipment.
MAPA PRODUCTS	MAPA Products has been a driving force in the manufacturing of rooftop supports.	Mueller	Mueller Steam Specialty is the world's largest supplier of strainers and the number one provider of specialty products serving the valve industry.
OASIS	Worldwide leader of bottled and pressure water coolers, providing point-of-use filtration equipment, drinking fountains, dehumidifiers and water pitcher systems.	ORION	Acid waste & high purity pipe and fitting systems.
POWERS A WATTS INDUSTRIES CO.	Manufacturers of thermostatic mixing valves for building, point-of-use and emergency equipment, tub/shower systems with pressure balancing, ther-mostatic, or combination shower controls.	tekmar® Control Systems	Leader in complete control solutions for radiant floor and baseboard heating systems, multi-stage boiler plants, and automatic snow melting systems.
WAL-RICH CORPORATION	Since 1950, Wal-Rich has been servicing the Plumbing Wholesaler with the finest in plumbing, heating, industrial and hardware specialties.	WARD MFG	Flexible corrugated piping systems for natural gas and propane, as well as iron fittings. Applications include single & multiple-family residential as well as industrial and commercial buildings.

IntelliStation™:

The smarter way to deliver tempered water

The Intelligent Water Mixing and Recirculation System

The IntelliStation™ provides unmatched levels of control over hot water delivery in commercial and institutional buildings.

- Precise digital control to +/-2°F
- Smart, easy-to-use controller with color touchscreen
- BAS integration
- Access to rich system data
- Integrated pump control for reliable, consistent temperatures
- Easy commissioning, repair, and management
- Sanitization mode allows for high temperature system purges
- Compliant with lead free legislation requirements

A DILLY OF A PARTY

@ Chicken N Pickle

Start the 2026 ASPE Expo with a pre-show party at Chicken N Pickle. You're invited!

Eat, drink, enjoy live music, and play pickleball, cornhole, and jenga with fellow plumbing design and engineering professionals.

Hosted by NIBCO, exclusive sponsor of the ASPE Opening Night Party.

ASPE Convention&Expo OKLAHOMA CITY | 2026

OCT. 11 • 7-10 PM

Chicken N Pickle
8400 N. Oklahoma Ave.
Oklahoma City

2026 ASPE Convention & Expo badge with icon required for entry

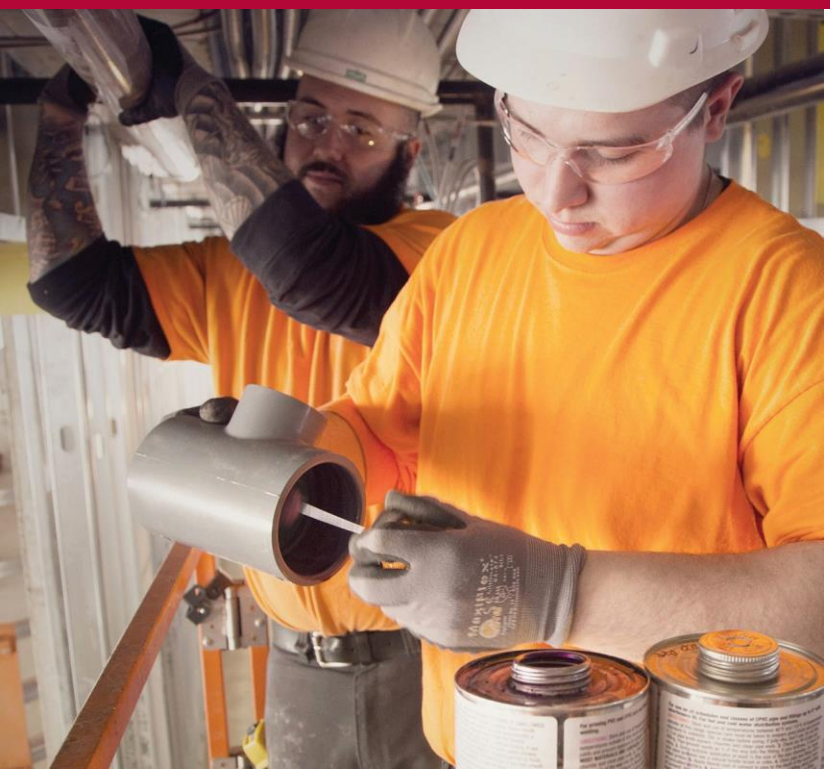
Spec with Confidence

Corzan®
MATERIAL & PIPING SOLUTIONS

PRECISELY ENGINEERED. REAL-WORLD TESTED.



CHECK IT. SPEC IT.
Corzan® CPVC

Corzan® Material and Piping Solutions offer a complete tie-in to tap solution made up of Schedule 80 pipe & fittings, flanges, valves, and specialty adapter fittings including: MIP Threads x CPVC, FIP Threads x CPVC, Stub Out Elbows, and Male Sweat Adapters. Potable water systems designed with Corzan CPVC offer the best solution for reducing biofilm buildup and the growth of Legionella while being immune to degradation caused by standard disinfection procedures.

Performance Ratings

- Plenum rated for water distribution piping (ASTM E84-23)
- Conforms to NSF International Standards 61 and 14
- Withstands ANSI/ASHRAE Guideline 188 water treatment protocols
- Innately resistant to corrosion, pitting and scaling
- Resists biofilm that can lead to waterborne illness
- Pressure rated for temperatures up to 200°F

Diverse Applications

- Academic Buildings
- Multi-Family Housing
- Hotels
- Hospitals
- Data Centers
- Power Generation
- Wastewater Treatment Plants
- Chemical Processing Facilities
