From the President:

Please welcome our newest member to the Cleveland Chapter, Robert Hartsock.

Save the Date! The annual Clambake Social at the Cleveland Yachting Club will be held on Wednesday, September 9, 2026. This event will be held at the Center Isle location. See attached flyer for additional information and registration.

A special thank you to Craig McDowell with

Omar McDowell Company for organizing the Clambake Social.

Registration is now OPEN! ASPE 2026 Convention & Expo is taking place in Oklahoma City, Oklahoma from October 8-14, 2026. Register at www.aspe.org.

I encourage all members—from seasoned engineers to our ASPE Young Professionals (AYP) and Women of ASPE (WOA)—to get involved. Please join us at our next chapter meeting to experience the camaraderie and educational opportunities our chapter has to offer.

Let us know if there are any specific topics you would like to see our chapter sponsor. We are always looking for new ideas. Remember, without membership and participation there is no local chapter.

PROUDLY PROVIDING THERMOSTATIC BALANCING SOLUTIONS FOR OVER 10 YEARS

Hot Water Recirculation

In 2012, CircuitSolver® was developed to conquer the challenges inherent to conventional manual balancing valves. As the market's first **thermostatic balancing valves** used for domestic hot water recirculation, CircuitSolver® balances a system based solely on temperature as opposed to pressure or flow to guarantee hot water at **every fixture**. Dynamically balancing a system, CircuitSolver® ultimately **ended complaints** about the lack of hot water, and eliminated balancing processes and callbacks.

Cold Water Recirculation

Last year, we implemented our thermal actuator technology into the CircuitSolver® Union Cold Water balancing valves. These valves are installed in domestic Cold Water recirculation systems to mitigate the risk of Legionella and other bacterial growth. Cold water recirculation is becoming more prominent in hospitals to reduce water stagnation and ensure residual chlorine is distributed but can be beneficial to any commercial building that could experience periods of low flow or non-use.
